Weather Summary/Alert:

* No rainfall to light rainfall is predicted in the next few days. • Sky will be partly cloudy in the next 5 days. • Relative humidity will be in the range of 13-76%. • Maximum temperature is expected to be around 39.0-42.0 degree and minimum temperature is likely to be 26.0-30.0 degree.

General Advisory:

Schedule irrigation during evening to minimize water loss due to evaporation.

SMS Advisory:

Drain the excess water immediately at Sesame, Jute, Mung, Groundnut, and vegetable fields .

Crop Specific Advisory:

Crop (Stage)	Crop Specific Advisory
RICE (Soft Dough)	Main field preparation : In most of the fields boro harvesting completed . Practice deep ploughing to prepare the main field of kharif paddy using premonsoon rainfall and mix the stubble well with mud.
SESAME (GINGELLY/TIL) (Pod Maturity)	Flowering to Pod Development Stage : Farmers are advised to monitor for pod borer infestation closely. If any plants are affected, promptly remove the affected parts. To control the infestation, spray neem oil @50ml/L of water. Ensure spraying is done during clear weather conditions for optimal effectiveness.
